

[Continue](#)

A software license is defined as a legal agreement between an end-user and the owner of a particular software program that details the terms and agreements for the use and distribution of the software. Furthermore, a software license usually outlines how many times a particular software can be downloaded, how much the use of the software costs, and the varying levels of source code access that end-users can take advantage of. The software license is an extremely important factor in ensuring that the legal and permissive rights of all involved parties of a software program are appropriately maintained. The Apache 2.0 license is a particular type of open-source, permissive software license that ensures that end-users are granted a license to any patent that is covered by the software in question. An Apache 2.0 license ensures the security and availability of safe and powerful open-source software. Features Of The Apache 2.0 License 1) Commercial Use Under the Apache 2.0 license, end-users can create their own proprietary software and offer the licensed code of the original software to customers. End-users can utilize the Apache 2.0 license in any commercially licensed software or enterprise application for free. However, Apache trademarks must not be used in the licensed proprietary software or any of the software's legal or organizational documentation. Studies show that the Apache 2.0 license is used by approximately 31.1% of websites with known web servers. 2) Source Code Modification and Distribution The Apache 2.0 license allows software developers to alter the source code of existing software's source code, copy the original source code or update the source code. Furthermore, developers can then distribute any copies or modifications that they make of the software's source code. Users must include a copy of their Apache 2.0 license, a clear attribution to it, and clearly identifiable modification notices on all altered files. 3) Establish Patent Claims The terms of the Apache 2.0 license state that end-users are provided perpetual and non-exclusive rights to patents and copyrights. Users are also permitted to create copyright statements for their modified software's source code. Furthermore, users can create their own specific terms and conditions for the use, distribution, modification, and reproduction of their modified software as it does not necessarily need to be made commercially available under the same software license. Corteza – Take Advantage of The Power Of An Apache 2.0 License Corteza, Planet Crust's low-code, open-source, digital work platform, is a powerful and advanced work environment that will allow your business to take advantage of the numerous features of an Apache 2.0 license such as creating enterprise applications for commercial use, modifying existing source code, creating patent claims and placing warranties on licensed software. Furthermore, Corteza can help users create powerful, scalable cloud applications, take advantage of enterprise CRM tools, and much more. Get a free trial so that your business can take advantage of the numerous benefits of creating enterprise applications or software using an Apache 2.0 license. You can use any Apache License 2.0 licensed software in your commercial products for free. However, you must not name your product in a way that it looks like an endorsement from Apache. You must also not use any of the Apache marks (like the multi-colored feather) anywhere in your product or its documentation. Lire la suite Article associé Can Apache License be used commercially? How do I get Apache 2.0 license? You may obtain a copy of the License at Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. What does Apache License 2.0 allow? The Apache License 2.0 outlines what users are allowed to do with the licensed code. Under this license, users can: Use the code commercially; Companies can include the licensed code in proprietary software that they then sell to customers. Is Apache License 2.0 copyleft? The Apache 2.0 license does not contain any copyleft requirements that would require you to share your modified source code. From the Apache License FAQ: I HAVE MADE CHANGES TO AN APACHE PACKAGE AND I WANT TO DISTRIBUTE THEM. Is Apache 2.0 compatible with MIT? This means that code released under Apache License 2.0 cannot be used in GPL v1 and v2 software. So if this kind of compatibility is needed, then Apache License 2.0 should not be chosen. If MIT Licensed code is combined with Apache License 2.0 code, then the derivative code might be Apache License 2.0. Article associé What does Apache License 2.0 allow? Ce que les utilisateurs sont autorisés à faire avec le code sous licence est décrit dans la licence Apache 2.0. Les utilisateurs peuvent utiliser le code à des fins commerciales, et les entreprises peuvent inclure le code sous licence dans les logiciels propriétaires qu'elles vendent à leurs clients. What can I do with Apache License? The Apache License is a permissive free software license written by the Apache Software Foundation (ASF). It allows users to use the software for any purpose, to distribute it, to modify it, and to distribute modified versions of the software under the terms of the license, without concern for royalties. What is the difference between MIT and Apache License? The MIT license is if you're afraid no one will use your code; you're making the licensing as short and non-intimidating as possible. The Apache License you are somewhat afraid of no one using your code, but you are also afraid of legal ambiguity and patent trolls. If you're the sole contributor to your project then either you or your company is the project's sole copyright holder. You can add or change to whatever license you or your company wants to. Otherwise there may be other copyright holders that you need agreement from in order to change licenses. Does Apache cost money? Apache software is always available free of charge. The Free Software Foundation considers the Apache License, Version 2.0 to be a free software license, compatible with version 3 of the GPL. The Software Freedom Law Center provides practical advice for developers about including permissively licensed source. Apache License logo da Apache Software Foundation Autor Apache Software Foundation Última versão 2.0 Editora Apache Software Foundation Publicado Janeiro de 2004 Compatível com DFSG Sim[1] Aprovado pela FSF Sim[2] Aprovado pela OSI Sim[3] Compatível com GPL GPLv3; Sim[2]GPLv1, GPLv1.1 e GPLv2; Não[2] Copyleft Não Pode ser ligado a código com licença diferente Sim Website www.apache.org/licenses/ A Licença Apache (Apache License em inglês) é uma licença de software livre permissiva de autoria da Apache Software Foundation (ASF). Todo software produzido pela ASF ou qualquer um dos seus projetos e subprojetos é licenciado de acordo com os termos da licença Apache. Alguns projetos não pertencentes à ASF também utilizam esta licença. A licença Apache (versões 1.0, 1.1 e 2.0) exigem a inclusão do aviso de copyright e um disclaimer, mas não é uma licença copyleft - ela permite o uso e distribuição do código fonte tanto no software open source como no software proprietário. Licença Apache 1.0 É a licença original Apache. Ela é aplicada somente nas versões antigas dos pacotes Apache (como a versão 1.2 do Web Server). Licença Apache 1.1 A versão 1.1 foi aprovada no ano de 2000 pela ASF. Uma mudança importante nesta versão ocorreu na "cláusula de propaganda" (seção 3 da licença 1.0). Os produtos derivados não são obrigados a incluir citação no seu material de propaganda, mas apenas na sua documentação.[4] Licença Apache 2.0 A ASF aprovou uma atualização da licença em janeiro de 2004. Os objetivos incluíam: simplificar a adoção da licença para projetos de fora da ASF, aumentar a compatibilidade com a licença GPL, permitir que a licença fosse incluída por referência ao invés da necessidade de incluí-la em cada arquivo, esclarecer a licença de contribuições e requisitar uma licença de patente para aquelas contribuições que necessariamente infringem as patentes do contribuidor.[4] Compatibilidade com a licença GPL A Free Software Foundation considera a versão 2.0 da licença Apache uma licença de software livre e compatível com a GPL 3.0, no entanto não compatível com as versões anteriores da GPL. [5] As versões anteriores da licença Apache (1.0 e 1.1) são incompatíveis e não são consideradas licenças livres. [6] Exemplos de tecnologias sob a licença Apache Apache Ant Apache HTTP Server e os seus módulos. Apache Lucene Apache Tomcat JXTA iCal Server - Apple Computer Google Web Toolkit Android TypeScript Pfx Todos os projetos produzidos pela Apache Software Foundation são licenciados de acordo com a licença Apache.
